00 — HOW I WORK

You know what you pay from day one.

I'm Naye and I build bespoke websites. I work with fixed prices and alongside you at every step: no small print and no surprises on the invoice.

03 — HOW WE DO IT

Three steps. I keep you posted at each one.

The first meeting to talk about your project is free: you tell me your idea and I put together a quote. It shows the price of each phase separately, so you know where every euro goes.

01

Planning and design

We set up the structure and I design how your website will look on desktop and mobile. You get 2 rounds of changes.

02

Development

I build it to be fast and easy to maintain.

03

Testing and launch

I check it on different devices, we publish it and I show you how to manage it yourself.

Extras, if you need them: Content upload · Website migration · Copy and SEO · Languages
